

## FOOD INDUSTRY

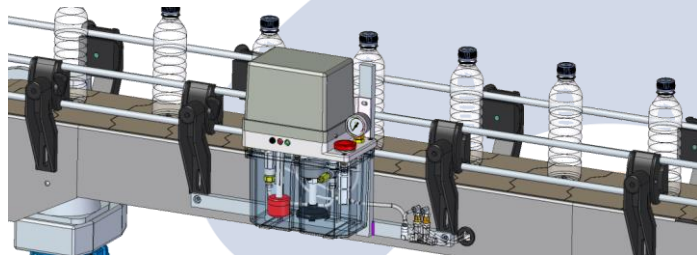

### SPECIAL ATTENTION TO HEALTH SAFETY AND CLEANLINESS

In automated processes of the food industry there is continuous movement of products between different process stages. As food is involved, cleanliness and health safety requirements must be strictly respected. **Intza Lubrication Systems** can manufacture all parts in **stainless steel** to fulfill the strictest specifications in terms of hygiene, cleanliness and health safety.

**Intza Lubrication Systems** manufactures and install several specific solutions:

1. **Dry lubrication** on belt conveyors>> much cleaner, avoiding bacterial growth and corrosion, saving in lubricant costs.
2. **Centralized lubrication to bearings**, replacing removable monopoint bottles.
3. **Chain and conveyors lubrication** with highest respect to environment.
