

## CHAINS AND CONVEYORS USED IN SO MANY ACTIVITIES

**Intza Lubrication Systems** offers a wide range of solutions for chain and conveyors used in so many different industrial and logistic activities for the transport of goods between subsequent handling processes:

- **Mist free lubrication of chains using oil or grease spray.**
- **Fast drop system.**
- With **mechanical contact** using brushes.
- **Following** the greasing point with sensors and applying grease on it.

We can find chains and conveyor in numerous sectors and activities, pictures just show a few of them. **Intza Lubrication Systems** can help you to find the most suitable lubrication system for your case, with the aim to increase the reliability of your production, to optimize the process, reduce costs and maintenance time, or to move your Company towards the Industry 4.0 or “internet of things” thanks to automation and centralization of lubrication.
